PETITION FOR ZONING VAR.ANCE FROM AREA AND HEIGHT REGULATIONS

TO THE ZONING COMMISSIONER OF BALTIMORE COUNTY

Jean & Isaac Coldman and I or we Eva & Morris Tucker I, or we, Eva. 6. BOFFAR TUCKEF.legal owners of the property situate in Baltimore
County and which is described in the description and plat attached hereto and made a part hereof.

hereby petition for a Variance from Section 1B01 1B02 (a)

a window from a tract boundary of 27' instead of the required 35'.

of the Zoning Regulations of Baltimore County, to the Zoning Law of Baltimore County; for the following reasons: (indicate hardship or practical difficulty)

The property is zoned DR16. Approximately one half of the property falls within a category of a maximum of 101 feet width (parallel property lines). This procludes achieving a reasonable density since entrance road, structure and other requirements violate the building set-back line of 35 feet from windows to property line.

See attached description

Z

FOR

ORDER

Property is to be posted and advertised as prescribed by Zoning Regulations.

1, or we, agree to pay expenses of above Variance advertising, posting, etc., upon filing of this.

East 250 feet to the place of beginning; containing

RE: PETITION FOR VARIANCE from Section 1801.2C.2A of the Baltimore County Zoning Regulations N/S of Church Lane 342 feet

COUNTY BOARD OF APPEALS OF

Morris Tucker et al

BALTIMORE COUNTY No. 74-124-A

DEFORE

OPINION

This case comes before the Board on an appeal by the Protestants from a decision of the Deputy Zoning Commissioner, dated December 4, 1973, which granted a side yard setback. The subject property is located at 110 Church Lane, in the Pikesville area. Same contains approximately 1.92 acres and is located on the north side of Church proximately 342 feet west of Bedford Avenue, and about 1200 feet west of Reisten town Road, in the Third Election District

The subject property is zoned D.R. 16, and the Petitioner proposes to construct approximately 28 townhouses on this parcel. The access to the subject property, which is irregular in shape, is from the north side of Church Lane. The frontess on Church Lane is approximately 101 feet

The variance requested is to permit a setback from a window location to the tract boundary line of approximately 27 feet instead of the required 35 feet. Ivan Stern, a joint venturer with the land owners, told the Board of his plans for this tract-These plans may be noted as detailed on Petitioner's Exhibit No. 4. The variance is in volved in the structure located nearest to Church Lane, and the windows in question would be those along the west side of this portion of the subject property.

At this point, the Board would like to point out that while the Petitione most assuredly promised to improve the subject site as proposed in Petitioner's Exhibit No. 4. this Board cannot require some, and if the Petitioner had a change of heart as to his current plans, the Board nor the County could not force the Petitioner to go forward with the plans as now presented to this Board.

Morris Tucker, et al. - No. 74-124-A

be better than a midrise in the mind of this Board seems to be more of a threat than of a distinct possibility for such a development at this particular site.

In conclusion, and after carefully considering the evidence and testimony presented in this case, the Board is not impressed by the Petitioner's request. The Board feels that there has been insufficient evidence and testimony to warrant the granting of the requested variance. In the mind of this Board, a case for unreasonable hardshir and/or practical difficulty has not been made. Thence, by the executed Order set out below, the Board will deny the requested variance

ORDER

For the reasons set forth in the aforegoing Opinion, it is this 6th day of ary, 1975, by the County Board of Appeals ORDERED, that the Variance petitioner for be and the same is hereby DENIED.

Any appeal from this decision must be in accordance with Chapter 1100, subtitle B of the Maryland Rules of Procedure.

> COUNTY BOARD OF APPEALS OF BALTIMORE COUNTY

Walter C. Horn,

FH. ING

ORD

Morris Tucker, et al - No. 74-124-A

William Kirwin, a land planner with the firm of Smith, Kirwin & Associates testified on behalf of the Petitioner, and further described the plans as now proposed for the subject property. Mr. Kirwin described the topography at the subject property and the amenities of the proposed plan, and particularly as same provided for the protection of the stream valley area and how the proposed plan would be better than a midrise apartmen cture on the subject property. While Mr. Kirwin compared the Petitioner's plan with some other plans that he felt would not be good for the property, Mr. Kirwin did admit that perhaps there were still other plans not considered which could readily be built upon the subject property. To the knowledge of this witness there was no physical reason why the subject property could not be developed in an orderly fashion without the requested

These two witnesses presented the Peritioner's case.

The Protestants included the adjoining property owner to the west, i.e. that property owner most directly affected by the variance request. This owner told the Board that she was opposed to the granting of the variance and felt that if this variance would be granted that it would adversely affect the enjoyment of her parcel, particularly as it pertained to light, air and privacy, which she felt the setback law provided to her. This witness told the Board that she understood when she bought her property twelve years ago that this subject site was zoned for apartments, and that some day perhaps same would be constructed there, but that she had relied upon the County Regulations and had anticipated that same would be no closer than the thirty-five feet that are now set out in the Zoning Regulations. Like many adjoining property owners, it is probably fair to summarize, that this Protestant would rather the subject property not be improved at all but that if it must be, then she would anticipate, and hopefully expect, that it would be constructed in accordance with the existing County Regulations, and this meaning, particularly in the subject case, no closer than the required side yard window setback of 35 feet from her easterly property line

The above succinctly summarizes the testimony and evidence presented to this Board. The sole question to be decided is whether or not the Petitioner has evidenced practical difficulty and/or unreasonable hardship. These are the measure

RE: PETITION FOR VARIANCE S Church Lane, 342' W of Bedford Avenue - 3rd Distric Morris Tucker, et al - Petitioner NO. 74-124-A (Item No. 72)

3 FFORE THE DEPUTY ZONING

COMMISSIONER

: BALTIMORE COUNTY

This Petition represents a request for a Variance to permit a setback from a window to a tract boundary of 27 feet instead of the required 35 feet. The tract in our stion contains 1, 92 acres, and is located on the north side of Church Lane, approximately 1, 200 feet west of Reisserstown Road, in the Third Election District of Baltimore County

Testimony and evidence presented indicated that the site is presently zoned D. R. 16 which would allow the construction of 31 condominium townhouses. The Petitioners' plans call for the construction of 28 townhouses on the irregular shaped tract.

This requer tor a cetback Variance for one of the buildings was based on practical difficulty due to the rarrow width of the frontage which extends back from a width of 101 feet for approximately 250 feet before it widens to a width of approximately 260 feet. The 101 feet of fronta along Church Lane provides the only access to the property. This roadway together with parking and other area requirements, effectively restricts the use of the property for which it is zoned.

The owner of an adjoining three apartment dwelling and two her area residents appeared in protest to the Variance. Their protest was based on the number of townhouses to be built and the existing traffic condis on Church Lane. The owner of the adjoining three apartment dwelling also objected to the townhouses being located any closer to her property than is permitted by law.

After reviewing the above testimony and other evidence presented, it is the opinion of the Deputy Zoning Commissioner that the Petitioners MICROFILMED

Morris Tucker, et al - No. 74-124-A

as to whether or not a variance from the existing zoning regulations may be granted by this Board. The Board sees absolutely no evidence of unreasonable hardship. As to whether or not there is a practical difficulty, the argument of the Petitioner has been care fully considered by this Board. After reflecting upon same, it is the judgment of this Board that the Petitioner has not proven practical difficulty of a substantial nature that might legally sustain the basis for granting the requested variance. has readily admitted that the property could physically be developed in its existing zoning as apartments without the granting of the variance. The Petitioner's basic argument for the granting of the voriance is that he can use the property for the proposed land use as set out on Petitioner's Exhibit No. 4, which, in the mind of the Petitioner, is a well conceived land utilization for the subject property.

As mentioned above, this Borrd, even if granting the variance, cannot compe the Petitioner to develop the subject property as now proposed on Petitioner's Exhibit No. 4 but even if the Board could so compel this petition as now presented, we do not feel that there has been evidence of practical difficulty.
The evidence seems to point to the fact that the Petitioner would be satisfied with his present plan, but frankly, the Board can see no practical difficulty that commands the granting of the variance. Likewise, the Board sees no commanding reason why the subject property must be developed in the manner as proposed on Petitioner's Exhibit No. 4. Furthermore, the Board has some wonder as to the overall concept put forth in the Petitioner's plans, and further wonders if the entire neighborhood that is now zoned D.R. 16 might not be misused if each subsequen lot owner would attempt to seek a similar variance and construct the townhouses in a perpendicular position to the Church Lane frontage. Also, it seems to this Board that with the relatively limited frontage of approximately 101 feet there may be some difficulty in the ingress and egress of traffic to Church Lene from the proposed townhouse development at the subject property. The Protestants' statements concerning on invasion of their light, air and privacy seems reasonable to this Board, and frankly in keeping with the spirit and intent of the setback regulation itself. The Petitioner's suggestion that his plan would

do have a hardship and/or practical difficulty, and that the Variance, with certain restrictions, can be granted without being injurious to the health, safety and general welfare of the community. The proposed townhouses wil present a lower profile and will be setback further from the front than the existing dwelling that will be razed when the townhouses are constructed. The setback of window to tract boundary relationship is intended to provide privacy. However, a screen fence of sufficient height constructed along the property line in question can accomplish the same results.

Therefore, IT IS ORDERED by the Deputy Zoning Commissioner of Baltimore County this 475 day of December 1973, that the herein requested Variance to permit a setback of 27 feet instead of the required 35 feet should be and the same is GRANTED from and after the date of this Order, subject to the following:

- 1. A redwood fence or a fence of other comparable material a min'mum of eight feet in height bein installed along the north 12 degree 1. minute wes 250 foot property line.
- 2. Approval of a site plan by the Department of Public rks, Health Department and the Office of Plann ing and Zoning.

ZONING COMMISSIONER OF BALTIMORE COUNTY County Office Building Towson, Maryland 21204

COUNTY BOARD OF APPEALS County Office Building Towson, Maryland 21204

PETITION OF APPELLANTS

TO THE CONORABLE. THE CHAIRMAN AND MEMBERS OF THE COUNTY BOARD OF APPEALS:

The petition of the Appellants, by Philip T. McCusker, their attorney, respectfully represents:

(1) That the cause above entitled is Appellants' appeal from the decision and order of the Zoning Commissioner of Baltimore County dated December 4, 1973, which granted the Patitioners' Patition for Variance in permitting a setback of twenty-seven feet instead of the prescribed thirty-five feet from the north 12 degree 16 minute west 250 foot property line.

(2) That the Appellants respectfully contend that the said Zoning Commissioner erred in granting such variance, appellants contending that the property 110 Church Lane is so narrow that the proposed construction, if proceeded with, would produce overcrowding and congestion in the immediate area as well as in adjacent areas, and that the granting of the variance clearly thwarts the very reason and purpose for which the thirty-five foot rule was made a part of the zoning regulations, and further

that the granting of the variance represents the only manner in which the proposed housing can be fitted (and literally crowded) into the tract of land; and further that the construction of twenty-eight housing units on what should reasonably, and in keeping with the age-old pattern of housing and residence along Church Lane, contain only two houses, is shockin'ly contraly to the long standing composition of the community of Church Lane and the surrounding residential areas.

(3) That this appeal is brought in the effort to secure a reversal of the decision and order dated December 4, 1973.

Philip'T. McCusker 2000 First Maryland Building 25 S. Charles Street Baltimore, Maryland 21201 539-2530

Re: Item #72 (1973-197h)

The following comments are furnished in regard to the plat submitted to this office for review by the Coning Advisory Countitee in connection with the subject item.

The plan should be revised to indicate the emisting structures on this site.

Church Lare, in existing public read, is proposed to be improved in the luture as a Mo-foot closed-type reading cross-section on a for-foot right-of-way. Highway improvements including highway right-of-way videning and may necessary revertible essences for slopes, will be required in commention with any grading or building

The status of "Dayer Road" is unknown and assumed to be private. It is the responsibility of the Patitioner to ascertain and clarify rights therein.

The entrance locations are subject to approval by the Department of Traffic Engineering and shall be constructed in accordance with Esitions County Standards.

Sediment Control:

Development of this property through stringing, grading and steldization could result in a sediment pollution problem, desaging private and subtle holdings downstream of the property a grading permit is, therefore, necessary for all grading, including the stripting of top soil.

Property Owner: Jean & Isaac Goldman & Eva & Morris Tucker mber 2, 1973

Provisions for accommodating storm water or drainage have not been indicated

The Fetitioner must provide necessary drainage facilities (temporary or restauent) to convent creating are mutaneous or damages to adjacent properties, especially by the concentration of surface waters. Correction of any problem which way result, due to improper grading or faproper installation of drainage facilities, would be the full responsibility of the Potitioner.

Open stream drainage requires a drainage reservation or easement of sufficient width to cover the flood plain of a 100-year design storm. However, a minimum width

Variance to permit a setback of a window from a tract be undary
of 27 feet instead of the required 35 feet

No traffic problems are anticipated by the requested variance to the setback of a window from a tract boundary, but I have the following comments for the site plan itself.

The entrance to the site must be a minimum of 24 feet. All

Dear Mr. Goldman:

The Zoning Advisory Committee has reviewed the plans submitted with the above referenced petition and has made an on site field inspection of the property. The following comments are a result of this review and inspection.

These comments are not intended to indicate the appropriateness of the zoning action requested, but to assure that all parties are made aware of plans or problems with regard to the davelopment plans that may have a bearing on this case. The Director of Planning may file a written report with the Zoning Coralissioner with recommendations as to the appropriateness of the requested zoning.

The subject property is located on the north side of Church Lane, 342 feet west of Bedford Avenue Church Lane, 342 feet west of Bedford Avenue This property, which is somed Di Bedford State of a window from a tract boundary line of 27 feet instead of the required 35 feet. The property is currently improved with a 2-1/2 story frame dwelling.

The petitioners propose to raze the existing structure and construct a condominium-townhouse development consisting of four groups with a total of 28 units.

The tract is irregular in shape and lies adjacent to existing residences on either side of the property.

Mr. Isaac Goldman Item 72 November 6, 1973

The petitioner is advised that the final development plan of this tract must comply with all sections of the Comprehensive Design Manual.

This petition is excepted for filing on the date of the enclosed filing certificate. Notice of the hearing date and time certificate. Notice less than 30, nor more than 90 days after the late on the filing certificate, will be forwarded to you in the near future.

Very truly yours, Olm & Cillian

JOHN J. DILLON, JR., Chairman Zoning Advisory Committee
