Patricia A. & Calvin D. Gilbert Petitioners

- * BEFORE THE
- * DEPUTY ZONING COMMISSIONER
- * OF BALTIMORE COUNTY
- * CASE NO. 04-442-A CASE NO. 04-443-A
- * CASE NO. 04-444-A

FINDINGS OF FACT AND CONCLUSIONS OF LAW

These matters come before this Deputy Zoning Commissioner as Petitions for Variance filed by the legal owners of the subject properties, Patricia A. and Calvin D. Gilbert. The Petitioners are requesting variance relief as follows:

Case No. 04-442-A: Property located at 3711 Clarks Point Road (Lot 53) in the eastern area of Baltimore County. Variance relief is requested from Section 1B02.3.C.1 of the Baltimore County Zoning Regulations (B.C.Z.R.), to permit a proposed dwelling with side yard setbacks of 8 ft. 8 in. and 2 ft. respectively, in lieu of the minimum required 10 ft. each, and to permit an undersized lot.

Case No. 04-443-A: Property located at 3713 Clarks Point Road (Lot 52) in the eastern area of Baltimore County. Variance relief is requested from Section 1B02.3.C.1 of the Baltimore County Zoning Regulations (B.C.Z.R.), to permit a proposed replacement dwelling (Isabel Damage) with side yard setbacks of 8 ft. and 8 in. and 5 ft. respectively, in lieu of the minimum required 10 ft. each.

Case No. 04-444-A: Property located at 3715 Clarks Point Road in the eastern area of Baltimore County. Variance relief is requested from Section 1B02.3.C.1 of the Baltimore

ONDER RECEIVED FOR FILMS

ON SECTION FOR FIL

County Zoning Regulations (B.C.Z.R.), to permit a proposed dwelling with side yard setbacks of 8 ft. and 8 in. and 2 ft. respectively, in lieu of the minimum required 10 ft. each and to permit an undersized lot.

These properties were posted with Notice of Hearing on May 3, 2004, for 15 days prior to the hearing, in order to notify all interested citizens of the requested zoning relief. In addition, a Notice of Zoning hearing was published in "The Jeffersonian" newspaper on May 4, 2004, to notify any interested persons of the scheduled hearing date.

Applicable Law

Section 307 of the B.C.Z.R. - Variances.

"The Zoning Commissioner of Baltimore County and the County Board of Appeals, upon appeal, shall have and they are hereby given the power to grant variances from height and area regulations, from off-street parking regulations, and from sign regulations only in cases where special circumstances or conditions exist that are peculiar to the land or structure which is the subject of the variance request and where strict compliance with the Zoning Regulations for Baltimore County would result in practical difficulty or unreasonable hardship. No increase in residential density beyond that otherwise allowable by the Zoning Regulations shall be permitted as a result of any such grant of a variance from height or area regulations. Furthermore, any such variance shall be granted only if in strict harmony with the spirit and intent of said height, area, off-street parking or sign regulations, and only in such manner as to grant relief without injury to the public health, safety and general welfare. They shall have no power to grant any other variances. Before granting any variance, the Zoning Commissioner shall require public notice to be given and shall hold a public hearing upon any application for a variance in the same manner as in the case of a petition for reclassification. Any order by the Zoning Commissioner or the County Board of Appeals granting a variance shall contain a finding of fact setting forth and specifying the reason or reasons for making such variance."

Section 304 of the B.C.Z.R. – Use of Undersized Single Family Lots (Reference Only)

Section 304, Use of Undersized Single-Family Lots [BCZR 1955; Bill No. 47-1992]

304.1[Bill Nos. 64-1999; 28-2001] Except as provided in Section 4A03, a one-family detached or semidetached dwelling may be erected on a lot having an area or width at the building line less than that required by the area regulations contained in these regulations if:

A.Such lot shall have been duly recorded either by deed or in a validly approved subdivision prior to March 30, 1955;

- B.All other requirements of the height and area regulations are complied with; and
- C. The owner of the lot does not own sufficient adjoining land to conform to the width and area requirements contained in these regulations.

Section 307 of the B.C.Z.R. – Variances.

"The Zoning Commissioner of Baltimore County and the County Board of Appeals, upon appeal, shall have and they are hereby given the power to grant variances from height and area regulations, from off-street parking regulations, and from sign regulations only in cases where special circumstances or conditions exist that are peculiar to the land or structure which is the subject of the variance request and where strict compliance with the Zoning Regulations for Baltimore County would result in practical difficulty or unreasonable hardship. No increase in residential density beyond that otherwise allowable by the Zoning Regulations shall be permitted as a result of any such grant of a variance from height or area regulations. Furthermore, any such variance shall be granted only if in strict harmony with the spirit and intent of said height, area, off-street parking or sign regulations, and only in such manner as to grant relief without injury to the public health, safety and general welfare. They shall have no power to grant any other variances. Before granting any variance, the Zoning Commissioner shall require public notice to be given and shall hold a public hearing upon any application for a variance in the same manner as in the case of a petition for reclassification. Any order by the Zoning Commissioner or the County Board of Appeals granting a variance shall contain a finding of fact setting forth and specifying the reason or reasons for making such variance."

Zoning Advisory Committee Comments

The Zoning Advisory Committee (ZAC) comments are made part of the record of this case and contain the following highlights: A ZAC comment was received from the Department of Environmental Protection & Resource Management (DEPRM) dated April 14, 2004 stating that the Petitioners must comply with the Chesapeake Bay Critical Area Regulations, a copy of which is attached hereto and made a part hereof. A ZAC comment was also received from the Office of Planning dated April 14, 2004, a copy of which is attached hereto and made a part hereof.

Interested Persons

Appearing at the hearing on behalf of the variance request was Edward Koplin, P.E. who prepared the site plan and Calvin and Patricia Gilbert, the Petitioners. Edward Covahey, Esquire represented the Petitioners. Ann and Victor Bassetti, John Steele, Christina Buedel and Clyde

Hargis appeared at the hearing in opposition to the Petition. People's Counsel, Peter Max Zimmerman, entered the appearance of his office in this case.

Testimony and Evidence

Testimony and evidence indicated that lot 53 (3711 Clarks Point Road) which consists of 13,238 sq. ft. is in the "Bowley's Quarter, Plat 2", subdivision which was recorded in the land records of Baltimore County on April 16, 1921. In addition, Petitioners own Lot 52 (3713 Clarks Point Road) which consists of 12,029 sq. ft. and Lot 51 (3715 Clarks Point Road) which consists of 13,176 sq. ft. These properties are all companion cases. See Petitioners' Exhibit No. 2 for the Bowleys Quarter subdivision and Petitioners' Exhibit Nos. 1A, 1B and 1C for the plan to accompany for each case. These three lots are adjacent to one another, are generally vacant, and are zoned DR 5.5. The cases were heard contemporaneously with one another and by agreement, all evidence and testimony in these case is applicable to all three.

Mr. Gilbert testified that he owns all three lots and that he and his wife have struggled to improve a "handyman's special" home located on lot 52, the center lot, they purchased 14 years ago. In addition to the home on lot 52, the properties are improved by a garage/carport, which is located near the Clark's Point Road and straddles lots 53 and 52. Mr. Gilbert testified that in September 2003, the area was struck by the storm surge of Hurricane Isabel and both their home and garage suffered extensive damage. The home, which was closer to the water's edge of Seneca Creek, was damaged so greatly that it was not feasible to rebuild. Consequently, the Petitioners razed the home. Mr. Gilbert testified that the proceeds from his insurance were only enough to pay off the first mortgage on the home. He said he needed the variances requested so

that he could sell the adjacent lots and thus afford to rebuild his home because his flood insurance was inadequate.

However, on cross-examination by the protestants, he admitted that he had entered into but had not settled on a contract for sale for all three lots with the engineer working on this case, Edward Koplin. He stated that the contract was for \$375,000 and was not contingent on the success of these zoning cases. He finally admitted that he would not be living in the middle home after the contract for sale was settled.

Mr. Covahey proffered that each lot was 50 ft. wide and that the 10 ft. setbacks required by the DR 5.5 zoning resulted in a home on each lot that was only 30 ft. wide. He proffered that a 30 ft. home on waterfront property in this section of Baltimore County was unrealistic. He further explained that the home on lot 52 could be rebuilt on the still existing foundation and that such a home would be approximately 36 ft. wide and non-conforming because it was 8 ft. 8 in. from one lot line and 5 ft. from the other lot line. Thus, the previously existing home could not meet the DR 5.5 zoning setback requirements and that requiring the owner to reduce the home to do so would be a hardship and present a practical difficulty. See Petitioners' Exhibit No. 1B and note that the garage is separated from the rebuilt home so that although it is 5 ft. from the lot line, the garage does not need a variance as a accessory building.

Mr. Gilbert presented photographs of homes in the area which were developed on 50 ft. lots. See Petitioners' Exhibit No. 9. He also described the area next to his lot 53 as a low lying wetlands area into which storm water drained from his lot.

Mr. Koplin, a registered professional engineer, who prepared the plan to accompany testified that the previously existing home on lot 52 was built in the 1950's and could not have

の問題の

met the DR 5.5 zoning side yard setback requirements of 10 ft. as it existed. He described the proposed home on lot 51 (see Petitioners' Exhibit No. 1C), which is a 36 ft. wide home which was laid out with the same side yard setbacks of 8 ft. 8 in. and 5 ft., as the previously existing home on lot 52. The proposed home on lot 53 is identical to the proposed home on lot 51. See Petitioners' Exhibit No. 1A. Note that in both of these two designs the garage is attached to the home with the additional variance requested that the side yard setback be 2 ft. instead of 10 ft. He indicated that this was a reasonable design for a modern home on the waterfront but admitted on cross-examination that if he separated the garage from the home, he would not need this variance by simply reducing the width of the garage 1 ft. He pointed out that detached accessory buildings are required only to be 2.5 ft. from the property line. Finally, he noted that the three proposed homes would be set back from the water in line with one another so that the home on lot 49, the Buedel property would not lose its view of the water.

He also testified that the three lots were unique because they were lower in elevation than the lots to the west, Buedel etc., as these lots had been raised in height over the years by filling. Because they are the lower lots in the area, they received the storm water from the higher lots and in turn discharged storm water onto the lots to the east, the wetlands. He testified that modern homes require more width than 30 ft. and that all three homes would have to be raised approximately 6 ft. above present elevation to meet the County flood requirements for homes in the flood plain. This also presented a hardship and practical difficulty in the extra expense incurred which had to be reflected in a larger (wider) home than is allowed under the DR 5.5 regulations. He presented detailed elevations for each home, which he indicated met all County regulations except the setbacks noted. See Petitioners' Exhibit Nos. 12A, 12B and 12C.

in the

On cross-examination, he admitted that he was the contract purchaser of the three lots, and that he intended to sell all the homes to the public. He denied allegations by the protestants that lot 53 had substantial areas of wetlands and emphasized that the lots and proposed homes had been reviewed and approved by DEPRM including the impervious surface area. He also denied that a 30 ft. wide home was practical even if it could be constructed with more length to give a home of equivalent size to those proposed.

The protestants opposed the variances requested primarily on the grounds that although the subdivision was laid out in 50 ft. lots, the neighborhood was developed with homes on several lots. They testified that developing this small group of homes on 50 ft. lots would change the character of the neighborhood. See the aerial map, Petitioners' Exhibit No. 11. The protestants point out that lot 54 is vacant. The subject lots have a garage that spans lots 53 and 51 while the previously existing home on lot 52 is centered on the three lots. They testified that the Petitioners used all three lots and that their pier serviced all three lots. Lots 50, 49 and 48 are owned by the Buedels (one of the protestants) who have a rental home on lot 50 and a garage on lot 49 which serves the main home that straddles lots 49 and 48. While lot 47 is developed with a home on a 50 ft. lot, lots 46, 45 and 44 are developed as one home on lot 45 with accessory structures to serve the main house on lots 46 and 44. In addition, the protestants objected to lining up all three of the proposed homes as presented. Again, they say that this would change the neighborhood in which the homes are staggered with respect to the distance each was built from the water.

The protestants complained that the three homes would overtax the public sewer line, would increase storm water runoff from the properties onto the wetlands to the west which would

ORDER RECEIVED FOR FRANCE

ORD

S/25/04

adversely affect wildlife in the wetlands, and that fire equipment could not get through homes to the water if placed so close together. They presented a letter dated September 18, 2000 from Keith Kelley of DEPRM and they argued that wetlands were present on lot 53 and that the required 35 ft. setback from wetlands had not been followed by the Petitioners in proposing a home on this lot. They emphasized that all the lots in this area of Bowley's Quarter were 50 ft. across and, therefore, not unique. They noted that all homes in the area had to be built up to pass flood surges and such economic difficulties did not constitute a hardship for variance cases.

Findings of Fact and Conclusions of Law

As this case will likely be appealed, I will make a detailed findings of fact and law to aid the appellate process. I will deny the variances requested for the following reasons:

Garage variance - 2 ft. in lieu of 10 ft.

As Mr Koplin indicated that he could avoid this variance by simply detaching the garage and reducing the size of the garage by 1 ft. Where there is a reasonable way to meet the zoning regulations there can not be a hardship by definition.

House variances - 8.6 ft and 5 ft in lieu of 10 ft.

It is true that this office has routinely approved and denied side yard setback variances similar to these requests for these waterfront properties in the eastern area of Baltimore County. We have held in approving these variances that when new zoning regulations are applied to recorded subdivisions and homes built according to old regulations, that in itself indicates "special circumstances or conditions exist that are peculiar to the land or structure which is the subject of the variance request" i.e. the property is unique. The reasoning for this is that the new regulations on old subdivisions impacts the old subdivisions differently than other subdivisions

which have been or could have been designed to the new standard. Typically an existing house in the old subdivision does not meet the new setback requirements and it is unreasonable to ask the owner to remove walls or reduce the size of the house to meet current standards. This office believes this finding is in accord with *Cromwell v Ward*, 102 MD 691, 651 A.2d 424. In that case the *Cromwell* Court cited with approval the definition of "unique" in the case of *North v*. St. Mary's County, 99 Md. App. at 512. The Cromwell Court said,

"In the zoning context the "unique" aspect of a variance requirement does not refer to the extent of improvements upon the property, or upon neighboring property. "Uniqueness" of a property for zoning purposes requires that the subject property have an inherent characteristic not shared by other properties in the area, i.e., its shape, topography, subsurface condition, environmental factors, historical significance, access or non-access to navigable waters, practical restrictions imposed by abutting properties (such as obstructions) or other similar restrictions. In respect to structures, it would relate to such characteristics as unusual architectural aspects and bearing or party walls."

While many of the reasons given by the court have to do with physical attributes of the land such as the existence of stream, wetlands, etc. the court recognized that the historical significance of existing structures and property triggers the disparate impact of the new regulation on those structures and property and signifies that the properties are unique. Historical significance can be shown by demonstrating that the property has been listed on a government historic preservation list or is located in a county imposed historic district. By analogy, we have found the imposition of new zoning regulations on old subdivisions likewise indicates that the properties in the old subdivision are unique even if there are no unusual physical aspects of the properties.

That said, I note the Petitioners' argument that the lower elevation of the three lots constitutes a unique feature of the lots compared to surrounding lots. I find, as a matter of fact,

that the three lots are lower in elevation than the surrounding lots. One test for uniqueness has to do with the disparate impact of the zoning regulations because of a physical feature. Lower elevation would clearly relate to the need to build the new homes above the flood plain, which would not be as severe on other lots that were higher. However, the problem presented by the Petitioner is side yard set backs. An irregularly shaped lot for example could trigger a disparate impact of side yard set back, but I am not sure how a lower elevation would affect side yard set backs. Nevertheless, I find the lots are unique.

Ordinarily, I would have no difficulty finding hardship and practical difficulty for requests for side yard set backs for a lot with an existing home, or one razed by a natural disaster such as Hurricane Isabel inflicted on this whole area of shore properties. However, there can be no hardship when the same owner owns adjacent properties and the need for variance avoided by simple lot line adjustments. In this case, the Petitioners own 150 ft. of lot width and can avoid the side yard set back variances by making lot line adjustment. The obvious result may be that they would reduce the three lots to two lots (two 75 ft. widths) on which they can build homes up to 50 ft. in width without a variance. Also see Section 304.1.C above for similar reasoning for undersized lots.

I find that the lots and shoreline shown on Petitioners' Exhibit No. 11 define the area, which constitutes the neighborhood in this case. I further find that while there is evidence of single 50 ft. lots being developed in this "neighborhood", homes on single 50 ft. lots are not the predominate development pattern. Rather, I find that the neighborhood has generally been developed with homes on multiple lots that have accessory structures to serve those homes. The Petitioners' lots are a good example. The garage/carport spanned two lot lines while the home

was located on the center of the three lots. The pier clearly served the home and all three lots. I find that to allow development on 50 ft. lots in this neighborhood would fundamentally change the nature of the area and would violate the spirit and intent of the regulations and adversely affect the general welfare of the neighborhood.

Pursuant to the advertisement, posting of the property, and public hearing on this Petition held, and after considering the testimony and evidence offered by the Petitioners, I find that the Petitioners' variance requests should be denied.

THEREFORE, IT IS ORDERED, this <u>35</u> day of May, 2004, by this Deputy Zoning Commissioner, that the Petitioners' requests for variance relief as follows:

<u>Case No. 04-442-A</u>: Property located at 3711 Clarks Point Road (Lot 53) in the eastern area of Baltimore County. Variance relief is requested from Section 1B02.3.C.1 of the Baltimore County Zoning Regulations (B.C.Z.R.), to permit a proposed dwelling with side yard setbacks of 8 ft. 8 in. and 2 ft. respectively, in lieu of the minimum required 10 ft. each, and to permit an undersized lot.

<u>Case No. 04-443-A</u>: Property located at 3713 Clarks Point Road (Lot 52) in the eastern area of Baltimore County. Variance relief is requested from Section 1B02.3.C.1 of the Baltimore County Zoning Regulations (B.C.Z.R.), to permit a proposed replacement dwelling (Isabel Damage) with side yard setbacks of 8 ft. and 8 in. and 5 ft. respectively, in lieu of the minimum required 10 ft. each.

Case No. 04-444-A: Property located at 3715 Clarks Point Road in the eastern area of Baltimore County. Variance relief is requested from Section 1B02.3.C.1 of the Baltimore County Zoning Regulations (B.C.Z.R.), to permit a proposed dwelling with side yard

ZONING REVIEW

ADVERTISING REQUIREMENTS AND PROCEDURES FOR ZONING HEARINGS

The <u>Baltimore County Zoning Regulations</u> (BCZR) require that notice be given to the general public/neighboring property owners relative to property which is the subject of an upcoming zoning hearing. For those petitions which require a public hearing, this notice is accomplished by posting a sign on the property (responsibility of the petitioner) and placement of a notice in a newspaper of general circulation in the County, both at least fifteen (15) days before the hearing

Zoning Review will ensure that the legal requirements for advertising are satisfied However, the petitioner is responsible for the costs associated with these requirements. The newspaper will bill the person listed below for the advertising. This advertising is due upon receipt and should be remitted directly to the newspaper.

OPINIONS MAY NOT BE ISSUED UNTIL ALL ADVERTISING COSTS ARE PAID.

Dear Mr. and Mrs. Gilbert:

RE: Case Number:04-442-A, 3711 Clarks Point Road, Lot 53

The above referenced petition was accepted for processing by the Bureau of Zoning Review, Department of Permits and Development Management (PDM) on March 29, 2004.

The Zoning Advisory Committee (ZAC), which consists of representatives from several approval agencies, has reviewed the plans that were submitted with your petition. All comments submitted thus far from the members of the ZAC are attached. These comments are not intended to indicate the appropriateness of the zoning action requested, but to ensure that all parties (zoning commissioner, attorney, petitioner, etc.) are made aware of plans or problems with regard to the proposed improvements that may have a bearing on this case. All comments will be placed in the permanent case file.

If you need further information or have any questions, please do not hesitate to contact the commenting agency.

Very truly yours,

u. Callibal D

For April 12, 2004 Item No. 442

The Bureau of Development Plans Review has reviewed the subject-zoning item.

DATE: May 18, 2004

The flood protection elevation for this site is 11.2 feet.

In conformance with *Federal Flood Insurance* requirements, the first floor or basement floor must be at least 1 foot above the flood plain elevation in all construction.

The property to be developed is located adjacent to tidewater. The developer is advised that the proper sections of the *Baltimore County Building Code* must be followed whereby elevation limitations are placed on the lowest floor (*including basements*) of residential (*commercial*) development.

The building engineer shall require a permit for the project.

The building shall be designed and adequately anchored to prevent flotation, collapse, and lateral movement of structure with materials resistant to flood damage.

Flood-resistant construction shall be in accordance with the requirement of B.O.C.A. International Building Code adopted by the county.

ZONING COMMIS!

INFORMATION:

Item Number:

4-442, 4-443 and 4-444

Petitioner:

Calvin David Gilbert

Zoning:

DR 5.5

Requested Action:

Variance

SUMMARY OF RECOMMENDATIONS:

It appears that the petitioner owns 3711, 3713, and 3715 Clarks Point Road. Theses are all adjoining lots and when combined, has sufficient land to conform to the width and area requirements contained in the BCZR. As such, the petitioner does not meet the requirements stated in Section 304.1.C of the BCZR. However, there is a mixture of lot sizes in the neighborhood, many of which are 50 feet wide.

The Office of Planning has reviewed the building elevations and photographs submitted by the petitioner and finds that the proposed dwelling is compatible with those existing in the neighborhood.

This office does not oppose the petitioner's request to construct a single family dwelling with an 8-foot 8-inch side yard setback. However, this office does not support the 2-foot side yard setback associated with 3711, and 3715 Clarks Point Road or the 5-foot side yard setback associated with 3713 Clarks Point Road. The petitioner should revise the plans so that there is minimum 10-foot side yard setback along these side property lines.

zoning variances

Dear Mr. Kotroco:

This letter is being written in regard to the above mentioned zoning variances.

I feel that it is necessary to protest granting of these variances for several reasons.

It is my understanding that the granting of a variance is limited to a showing of "hardship". I do not feel that is present in this situation.

The property lies within the critical area. Also, the characteristics of this property are not unique compared to others in the area.

The applicant is not planning to reside at this address. According to the paperwork that I have received, the property has been sold, with settlement due to take place in June, 2004. Also, the adjoining property, lot number 54, is for sale.

My property is on the opposite side, and we have continual problems with water in the road from the existing construction.

There are several other matters that I can testify to, also.

If these variances are granted, I feel that it will establish a troublesome precedent.

I am prepared to attend these hearings.

Sincerely,

É. Christina Bladel

E. Christina Buedel

September 18, 2000.

Mr. Roger Mowery 3337 Edwards Lane Baltimore, Maryland 21220

> Re: 3709-3711 Clarks Pt. Rd. Preliminary Assessment Mowery Property

Dear Mr. Mowery:

The Department of Environmental Protection and Resource Management has completed a preliminary assessment regarding environmental constraints on the above referenced property. The site is located within the Limited Development Area (LDA) of the Chesapeake Bay Critical Area (CBCA) and is subject to the following regulations:

- 1. Non-tidal wetlands exist on a majority of the site. A minimum 25-foot buffer is required from the outer edge of any non-tidal wetland. In addition, a 35-foot setback is required for any principle structure from the buffer which shall be known as a Critical Area Easement (CAE). The existing non-tidal wetlands have already been delineated by county, state, and federal personnel as part of the Special Area Management Plan (SAMP) for the forthcoming sanitary sewer project. These wetlands have been designated for preservation. A copy of the portion of the report pertaining to this particular property has been enclosed for your use. Any CAE shall be recorded as such in Baltimore County Land Records.
- 2. Lots less than one-half acre in size are limited to 25% man-made impervious surfaces. The lots are 50' x 377' and 50' x 392' according to tax records.
 - 3. A forest cover equaling 15% must be maintained or established. This equates to six (6) trees per lot in your case. The property is partially forested and partially overgrown with phragmites and weeds closer to the water.
 - 4. Rooftop runoff must be directed across a pervious area such as lawn or forest to encourage maximum infiltration for any new construction.

If you have any questions regarding this matter, please call me at 410-887-3980.

Sincerely,

Keith Kelley

Bowley's Quarters Improvement Association 1124 Bowley's Quarters Rd. Middle River, Md. 21220

TO:

Baltimore County

Zoning Commissioner

REFERENCE:

Zoning Issues

Case # 04-442-A

Case # 04-443-A

Case # 04-444-A

PROPERTY ADDRESS

3713 Clarks Point Road

The original property consisting of three (3) lots contained one (1) home, which was destroyed by hurricane Isabel. Lot # 51, 52, 53.

The property has been sold, and the new owner has requested variances, for the construction of three (3) homes.

Case # 04-442-A

Side yard setbacks of 8 ft + 8" and 2 ft in lieu of the 10 ft.

requirement, and to permit an undersized lot.

Case # 04-443-A

Side yard setbacks 8 ft + 8" and 5 ft. in lieu of 10ft requirement

Case # 04-444-A

Side yard setbacks of 8 ft + 8"and 2 ft in lieu of 10 ft requirement

and to permit an undersized lot.

The adjacent property owner Ms. Buedel has brought this zoning issue to the attention of the association and is firmly against having a house built next to the property within 2 ft of the property line.

The Bowley's Quarters Improvement Association supports this position, and agrees that a precedent will be set, for the entire community, if the undersized setbacks are permitted.

Development in the Community due to the extension of sewage, and the destruction of hurricane Isabel, will bring many issues before the commissioner.

Over development and in particular set back issues must be diligently addressed.

Michael Thirto

President of Bowley's Quarters Improvement Association

Dear Owner:

I promised you an update to keep you informed on the property sales activity in the neighborhood! On the reverse side I have provided you with an updated market analysis of the recent sales in the community. If you are considering selling your home at the present time, lower interest rates have created very active real estate market! As you can see there are very few homes in your area on the market today! Please consider me for excellent service in marketing your home.

I look forward for the opportunity of working for you; please give me a call at 410-825-6400 or at my home 410-494-0110 if you have any questions.

Sincerely,

Connie Jones, CRS, GRI, SRES
